

# 3-in-1 Mousepad

The mousepad is supplied with a printed background card, individually packaged in a transparent PLA bag. PLA is made from plant-based starch.

The background card is printed with the customer's own graphics on Recystar Nature cardboard, which is laminated with biodegradable BOSS BOPP laminating plastic, if necessary, to help keep the mouse pad in place as intended.

In this help file, you will find the mousepad material on the first page and the background card on page 2. The 3-in-1 feature comes in three uses: a mouse pad, a screen cleaning cloth, and a screen protector on your laptop between the keyboard.

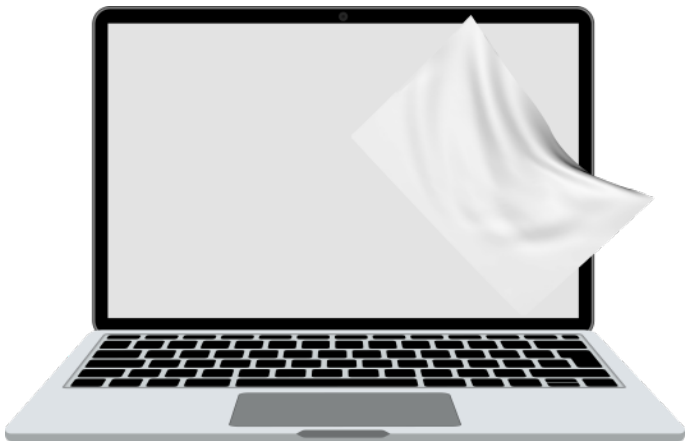

Mousepad 220 x 180 mm  
Artwork 230 x 190 mm  
Safety area 210 x 170 mm

# 3-in-1 Mousepad packaging

The packaging insert is printed in full color. Please supply the graphics spread into two separate pages if you want customized graphics on both sides of the card. You can use the Use Instructions below on your design.

3in1

Mousepad

It's also a microfiber cleaning cloth, and a laptop keyboard protector
