

Glue Bound Printed Notepads

Use this Artwork Instructions file as a guide when designing custom artwork for glue-bound notepads. For the uncoated paper, PSO Uncoated ISO12647 (Fogra 47Lr), you should always supply the files as vectorized PDF files in CMYK format.

If you cannot create a print file, use our easy template selector on the product page or ask our graphics team to assist you with the design. Avoid placing elements less than 3mm from the edge of a finished product.
