

Build a Perfect Printed Conference Badge

How many holes would you require?

Depending on the type of attachment, we can add more holes to the badges. Most lanyards come with a single metal clip. If you opt for a lanyard with two hooks, we can punch holes on each corner to make the conference badge more stable to wear.

Rounded corners (optional)

Rounded corners are free of charge but optional. You can opt out of rounded corners if you prefer a sharp look.

Hole shape

Most of our lanyards have a trigger clip hook that works perfectly with a round hole. An oval hole is also available if you have a particular clip preference.
